DETAILED ACTION

Allowable Subject Matter

1. Claims 1-10 are allowed.
2. The following is an examiner's statement of reasons for allowance: The present invention pertains to a bowling ball resurfacing device. It is the examiner's opinion that the art of record considered as a whole, alone or in combination, neither anticipates nor renders obvious, first and second vertical support rollers in combination with first and second horizontal support rollers for automatically and uniformly cleansing, abrading, polishing and refurbishing the entire surface of a bowling ball without an unbalanced abrasion, while causing the rotational direction of the bowling ball to vary in many different directions, together in combination with the rest of the limitations or the independent claims.
3. Prior art; Klukos (6439982) discloses a ball spinner and polish apparatus comprising a housing (10) first and second horizontal support rollers (22, 24), roller driving means (49) formed as a motor for rotating said horizontal support rollers, abrading-and-polishing means including a polisher (16) which can formed of varying grits, abrasiveness and shapes in order to polish a bowling ball while the ball is in rotation (Figure 2 and 3), and a fluid dispenser (14) for supplying fluid to the surface of the bowling ball (Figure 5). Nam (2003/049996) discloses a bowling ball resurfacing device comprising first and second rolling wheels (Figure 2) (40, 50) within a housing (10) driving means formed as shafts connected to a motor for rotating said first and second rolling wheels, and abrasion assisting fluid supply means formed as a reservoir

(90), a fluid pump (92), and a feeding tube (94) for supplying abrasion fluid to the surface of a bowling ball.

4. However, the prior art fails to disclose a bowling ball resurfacing device comprising first and second vertical support rollers in combination with first and second horizontal support rollers for automatically and uniformly cleansing, abrading, polishing and furbishing the entire surface of a bowling ball without an unbalanced abrasion, while causing the rotational direction of the bowling ball to vary in many different directions.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert Scruggs whose telephone number is 571-272-8682. The examiner can normally be reached on Monday-Friday, 8:30-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph Hail can be reached on 571-272-4485. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
